

Septictrine®

NATURAL ENZYME SEPTIC TANK CLEANER

DIRECTIONS

Septic Tanks:

Use 2 ounces Septictrine® per 500 gallons tank capacity once a week until system is operative. Then add maintenance treatment of 2 ounces per 500 gallons every two weeks. Apply by flushing down toilet or drain.

Cesspools, Dumping Stations:

Follow directions for septic tanks. Apply Septictrine directly into system.

Holding Tanks (RV, Boat, Bus):

Flush 2 ounces Septictrine and 1 gallon water into tank. Add 2 ounces Septictrine every other day, using enough water to flush into tank. After tank is dumped, resume first two steps.

Drain Fields:

For each 500 feet of field, dilute 2 ounces Septictrine with 10 gallons of water. Sprinkle or spray directly over field surface.

Kitchen, Bathroom, Drains:

For clogged drains, flush 2 ounces Septictrine with lukewarm water down drain. Best results are obtained by applying at night when drain is not in use. Repeat as needed.

Composting:

For each 400-600 square feet of organic matter, dilute 8 ounces Septictrine with water and sprinkle over surface mass. Turn pile and repeat treatment every two weeks.

CAUTION: Hot water destroys action. Use only lukewarm water.

WARRANTY STATEMENT

To the extent consistent with applicable law neither the manufacturer nor the seller makes any warranty, expressed or implied concerning the use of this product other than indicated on the label. To the extent consistent with applicable law buyer assumes risk of use of this material when such use is contrary to label instructions. Read and follow the label directions.
