

Brewer Defoamer

Super Concentrated Foam Buster

Ingredients:

Active Ingredients: Dimethyl-polysiloxane
suspension.....10%
Inert Ingredients: Components ineffective as adjuvant...90%
Total: 100%

Brewer Defoamer can be used for foaming problems in spray tanks by adding it directly to spray tank when foaming exists or even before adding herbicide, pesticide, or wetting agent to prevent foam.

Directions For Use:

Foaming in spray tank: 4 to 10 ounces per 100 gallons
Existing foam: 4 to 12 ounces squirted on top

Avoid freezing, white in appearance.
